Project Title	House Price Prediction in Perth
Team Members	Bharat Guturi
Project Description/Outline	This project aims to determine the factors affecting the house prices in Perth and predict the house prices in Perth suburbs based on historical data.
Datasets to Be Used	We are using data from the following: https://www.kaggle.com/datasets/syuzai/perth-house-prices and using the csv files all_perth_310121.csv
Process	1) ETL 2) Save records to Postgresql 3) Run Machine learning predictions based on machine learning algorithms 4) Display the predicted house price using web application (deployed in Heroku)
